From idea to output

WORKING WITH MICROSOFT COPILOT

Susanth Sutheesh
Copilot Solution Engineer, Microsoft

datacamp

Starting in the Copilot App

- The Copilot app is your hub for cross-file work
- It connects different file types in one workspace
- Ask questions across multiple files and get combined answers instantly

Why this matters

- Microsoft 365 Copilot connects your work across apps
- Move seamlessly between writing, analyzing, and presenting without breaking flow

Let's practice!

WORKING WITH MICROSOFT COPILOT

Data and research agents in action

Analyst Agent overview

Analyst Agent overview

> Which region has shown the fastest growth compared to last quarter?

- Best with structured data like spreadsheets or CSVs
- Enables precise insights, e.g., growth comparisons
- Ask business questions in plain language; Copilot handles analysis

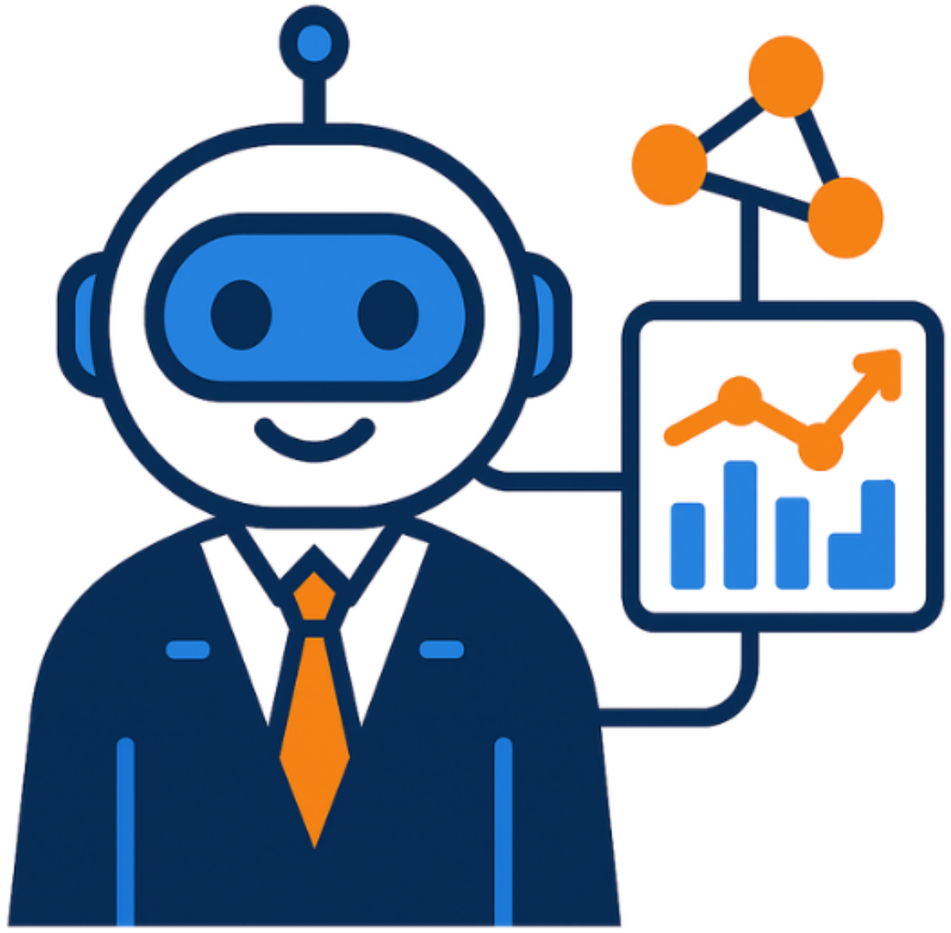

DEMO VIDEO

Researcher Agent overview

- The Researcher Agent gathers in-depth information from your files
- It extracts precise details from documents and presentations
- Goes beyond summarization to provide deeper analysis

Researcher Agent overview

- Connects ideas across files to reveal gaps and themes
- Powers strategic tasks like planning and messaging
- Acts as a business analyst Copilot, delivering real insights
